

OrangeHRM Manual Testing Project

Project Overview

I recently completed a Manual Testing Project on the OrangeHRM web application. The objective of this project was to apply software testing concepts in a real-world application and gain hands-on experience in manual testing.

During this project, I performed Functional Testing, Exploratory Testing, and Regression Testing across multiple modules of the application.

Modules Covered

- Login
- Dashboard
- Admin
- PIM (Personnel Information Management)
- Leave Management
- Recruitment
- My Info
- Logout

Testing Activities Performed

- Test Planning
- Test Case Design
- Test Execution
- Defect Reporting
- Exploratory Testing
- Functional Testing
- Regression Testing

Project Deliverables

- Test Plan Document
- 100+ Manual Test Cases
- Bug Report Document
- Test Execution Results

Tools Used

- Microsoft Excel
- Microsoft Word
- Google Chrome
- Windows 11
- GitHub

Repository Contents

- Test_Plan_of_HRM.pdf
- Test_Cases_of_All_Module(OrangeHRM).xlsx
- Sample_Bug.xlsx

Skills Demonstrated

- Manual Testing
- Test Case Design
- Defect Reporting
- Software Testing Life Cycle (STLC)
- Functional Testing
- Exploratory Testing
- Regression Testing
- Documentation
